 3 Golden Rules for Protecting Diabetic Eyes

- 1. Strict Glycemic Control:** Maintain HbA1c below 7.0% and take prescribed diabetes medications daily.
 - 2. Active Lifestyle & Diet:** Walk 30 minutes every day, reduce refined sugar, and eat leafy green vegetables.
 - 3. Annual Preventive Screening:** Do not wait for blurry vision to develop; screen your eyes every 12 months at the PHC.
- Supported by Frontline ASHA Workers | Early screening prevents 95% of diabetic blindness.*
